

LIFE CHANGING
CAREERS

A **career** with a view

-  @SpecsaversCareers
-  @acareerwithaview
-  @SpecsaversJobs

An optometrist wearing a black hijab and uniform is seated at a desk, operating a large, white NIDEK eye examination machine. The machine is positioned over a patient's head. The optometrist is looking at a computer monitor displaying a software interface with various data fields and buttons. The patient is a woman with long, light brown hair, seen from the side. The background is a light green wall. A large, curved green graphic element is in the top right corner, and a white curved graphic element is in the bottom left corner.

What is **optometry?**

Optometrists examine the eyes to detect defects in vision, signs of injury, ocular diseases or abnormality and problems with general health, such as high blood pressure or diabetes.

Why **optometry?**
